Company Profile

Founded in 2011, Tenon is a famous high-tech enterprise in China, which is specializing in research, production and selling digital smart locks. With 10 years manufacturing experience, TENON, the national high-tech enterprise in China, is the first Listed Company (Stock Code 833559) in the smart lock industry. Our company has over 500 employees with registered capital of RMB 102 million.

Covering an area of 11,000 square meters, we possess the dust-free SMT production workshop, laboratory and R & D center that are the solid foundation of producing all circuit boards and hardware in excellent quality. With our strong production capacity, advanced equipment, experienced staff and excellent techniques, we are capable of providing a complete range of smart locks for clients.

With Tenon continuous product development and satisfactory after-sales service, Tenon has received great praise from hundreds of agents/distributors and countless end-users. Now, there are more than 6,000 sales points and 300 agents in domestic and overseas.

COOPERATION

At present, Tenon has established cooperative relations with many enterprises and property developers. Dozens of top 100 real estate enterprises partners.

SOME CLASSIC CASES

We enjoy the tremendous popularity in China and get to be approved from our clients for our first-rate product quality, complete service and strong strength of the enterprise.

Comprehensive Support For A Variety Of Channels.Explore Profitable Opportunities.

As one of the earliest enterprises to enter the smart lock industry, Tenon has laid out a variety of channels.

Agents can operate channels flexibly according to their own characteristics, Furthermore,

Tenon will provide support from activities, policies, and funds.

PRODUCTS _ K SERIES

K1

Small Body High Performance

PRODUCT FEATURES

- Use the advanced fingerprint reader,excellent at distinguish fake and shallow fingerprint.
- The handle with U shape special design, comfort grab feel and wear resistant.
- The passage mode can be quickly set by simply pressing the function key, enter and exit freely without verification.
- Voice prompt, easy operation, the latest information of the door lock can be monitored through App.
- Bluetooth Tuya app lets you enjoy intelligent life.

PRODUCTS_ K SERIES

BASIC SPECIFICATION

Unlocking ways: Fingerprint / Mechanical Key / Bluetooth / Tuya App

Color: Black

Operation system: Classic voice prompt

User capacity: 20 groups

Material: Aluminum alloy

Fingerprint Reader: Semiconductor Sensor

Fingerprint Identification Time: ≤0.5s

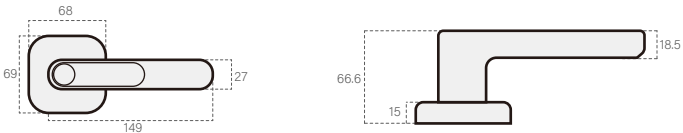

Mechanical Keys: 2

Working Power: 6V (4*1.5V AAA alkaline battery)

Working Environment: -20°C~55°C

Suitable Door Thickness: 35-60mm

Diagram Unit: mm

Minmalist Designs

PRODUCT FEATURES

1. Fingerprint sensor is on the handle, one step unlocking.
2. New RF learning semiconduct fingerprint sensor; The longer used, the more sensitive.
3. The cat-proof mechanical dial button design prevents the technology tools from turning on.
4. Doorbell function: Timely remind of you when there are guests for visiting.
5. MCU system encrypts communication independently and without interference to each other.
6. Low power consumption.

Biometric fingerprint reader

(RF semiconductor fingerprint sensor)

Low voltage alarming

(<4.8V alarming notification)

Virtual password

(Any numbers can be added before or after the right ones)

Emergency battery

(USB interface)

Tuya APP

(Bluetooth Tuya App)

Password protection

(Enter password wrong 5 times in 3 minutes, the lock will go into sleep mode)

BASIC SPECIFICATION

Unlocking ways :Fingerprint / Password / Mechanical key / IC Card / Bluetooth / Tuya App

Color:Black/Silver

Operation System :Classic Voice Prompt

User Capacity :99 Groups

Material:Aluminum Alloys

Fingerprint Reader:Semiconductor Sensor

Password Input:Touch Key

Password Function:Virtual Password; Password Protection

Chip System:Dual Cpus and dual system

Fingerprint Identification Time: $\leq 0.5s$

Up-down Hook:Support

Cylinder Lock:Grade C

Mechanical Keys: 2

Working Power:4*1.5V AA Alkaline Battery

Working Environment:-20℃-75℃

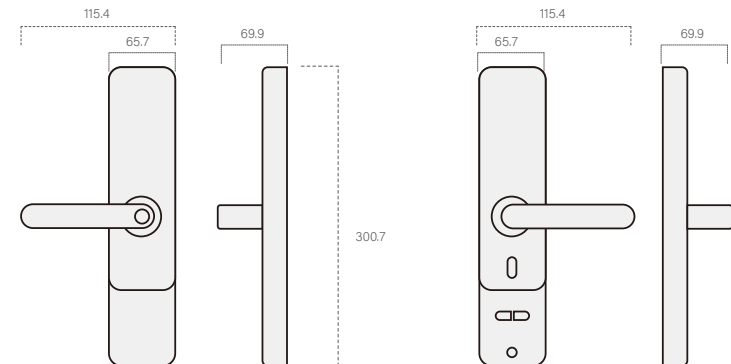

Suitable Door Thickness:45-100mm

Suitable Lock Body:J6068EX (Standard)

K7

Delicate And Exquisite Design

PRODUCT FEATURES

- Equipped with semiconductor fingerprint sensor, excellent at distinguish fake and shallow fingerprint.
- Square panels with rounded corners, full glass screen highlights the texture.
- Voice prompt, different colors represent different states of the door lock.
- Hide the keyhole under the rounded cover of the front panel which ensure safety and beautiful look.
- Use bluetooth app to share temporary passwords to guests.
